

Artwork Specifications

Please submit artwork that meets the specifications outlined below. Artwork will be printed exactly as provided.

NOTE:

While artwork can be uploaded in any shape, small details and text below certain sizes may not have sufficient adhesive to apply properly.

File Formats

VECTOR

Preferred Format:

.pdf

Accepted Formats:

.ai .svg .eps

RASTER

Preferred Format:

.png (With transparent background)

*Accepted Formats:

.tiff (With transparent background)

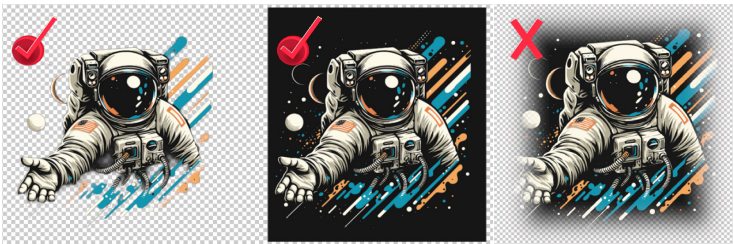

.jpg .psd

*May incur art charges. For best results, we recommend artwork at 300 DPI at actual size.

Artwork Requirements

- Submit final artwork only (no notes, instructions, copies of art, etc.)
- Artwork must have clean, hard edges. No soft edges, shadows, fades, or transparency.
- Artwork will be printed exactly as supplied; files will not be modified or cleaned up unless requested for an **additional fee**.
- Any background elements in the file will be printed.
- The artboard should be set to the exact size of the final artwork.
- Convert all text, strokes, and outlines to paths or curves.
- **IMPORTANT:** Minimum line thickness is **0.018"**.

Artwork Examples

Clean, Hard Edges, Full-Color/Full-Transparent Backgrounds

Production Setup & File Assistance

Production setup is included with your order and covers up to **30 minutes** of setup time. (\$37.50 Value)

Orders requiring additional setup time beyond the standard 30 minutes will incur art charges **billed in 15-minute increments**.

Color

Any areas intended to print white must be set to **UVDTF Spot White (CMYK 0, 0, 0, 1)** or **Hex #FBFBFD**.

Printed colors may not match exactly what you see on your monitor.

Decals are printed using **CMYK + White** with a **gloss finish**.

UV DTF prints will not exactly match colors produced by our other printing methods.

(Red) Lines in Graphic are Too Thin to Adhere.

Minimum line thickness is 0.018"
